Summary

Senior Software Engineer with 13+ years of experience building scalable backend systems, distributed architectures and high-reliability services. I have deep expertise in Elixir, Phoenix, OTP and Postgres. Along with strong experience designing APIs, integrating third-party services and optimizing system performance. My background spans fintech, e-mobility and large-scale e-commerce, where I've delivered production systems end-to-end and improved system stability, performance and maintainability.

I collaborate effectively with cross-functional teams, translate complex requirements into clean solutions and take ownership of architectural decisions and long-term technical quality. I'm comfortable working in fast-moving, remote environments and open to both full-time and B2B engagements worldwide.

Skills

- Languages & Frameworks: Elixir, Phoenix, LiveView, OTP, Python, Django, PHP, Symfony, Drupal
- Databases: PostgreSQL, MySQL/MariaDB, Clickhouse, Oracle, Couchbase, Redis
- DevOps & Cloud: AWS, GCP, Docker, CI/CD, Kubernetes, Terraform
- Other: OOP, DDD, Software Design Patterns, Protocol Buffers, Oban, Tailwind CSS, Datadog
- Languages: English (Professional), Czech (Professional), Russian (Bilingual), Uzbek (Native)

Professional Experience

Senior Software Development Engineer

Yolo Group | Prague, Czech Republic | Jul 2024 – Present

- Developed and maintained distributed Elixir/Phoenix services powering high-volume internal systems.
- Built event-driven workflows using OTP, GenServers and Oban to ensure reliability under heavy load.
- Optimized system performance and improved data consistency across multiple services.
- Collaborated with product, data, and engineering teams to deliver features end-to-end.
- Contributed to architectural decisions, code reviews, and mentoring of team members.

Technologies: Elixir, Phoenix, LiveView, OTP, TailwindCSS, Oban, ExUnit, Clickhouse, GitHub, Datadog, OpenSearch, PostgreSQL, CI/CD, AWS, Google Protobuf.

Senior Software Engineer

Currys plc | Prague, Czech Republic | Mar 2021 – Jun 2024

- Member of the Order Management team, developing and maintaining backend services for one of the UK's largest retail and e-commerce platform.
- Enhanced core backend systems that support large-scale e-commerce order management workflows.
- Refactored and optimized existing systems, improving API performance and reliability
- Collaborated with product and cross-functional stakeholders to analyze business requirements and transform them into reliable technical solutions.
- Delivered maintainable, testable code following engineering best practices.

Technologies: Elixir, Phoenix, OTP, LiveView, TailwindCSS, ExUnit, Couchbase, Python, Django, Oracle, GitHub, Kubernetes, Terraform

Software Engineer

Alpiq | Prague, Czech Republic | Mar 2019 – Mar 2021

- Split monolithic e-mobility platform into frontend/backend architecture
 - Designed and developed REST APIs, documented with Swagger
 - Built reports using Python libraries, enabling better business insights
- Technologies:** Elixir, Phoenix, PostgreSQL, REST API, Swagger, Python, Matplotlib, Pandas

Senior Backend Developer

Nadace Sirius | Prague, Czech Republic | Oct 2018 – Mar 2019

- Developed charity project 'Patron Děťí' from scratch in Drupal 8
- Managed deployment, monitoring, and test coverage (unit, integration)

Technologies: PHP, Drupal 8, MariaDB, REST API, Docker, Redis

Team Lead / Senior Backend Developer

Finnology | Prague, Czech Republic | Mar 2016 – Sep 2018

- Managed team of 6 engineers in developing fintech platform
- Designed architecture, implemented backend modules, conducted code reviews
- Improved system stability and maintainability

Technologies: PHP, Company owned framework, DDD, GitLab, Unit tests, Memcached, RabbitMQ

Backend Developer

LinkSoft Technologies a.s | Prague, Czech Republic | Jan 2013 – Mar 2016

- Maintained and supported EU Nestlé Baby projects
- Implemented new features, optimized performance, and conducted testing

Technologies: PHP, Drupal 6/7, GitHub, MySQL

Selected Projects

- Timesheet App – Built personal project using Elixir, Phoenix, and PostgreSQL (<https://timesheet-aza.gigalixirapp.com>)
- Patron Děti – Nationwide charity donation platform built on Drupal 8 (<https://patrondeti.cz/>)
- Currys PLC - Large-scale e-commerce platform in UK (<https://www.currys.co.uk/>)

Education

Master's Degree, Information Technologies | Tashkent State Technical University

Bachelor's Degree, Information Technologies | Tashkent State Technical University

Web Development & Server Programming | Bauman Technical University (Specialist Training Center)

Certifications

- AWS Certified Cloud Practitioner (CLF-C01)
- Learning Kubernetes
- Python, PHP, Erlang (Udemy & W3Schools)
- The Complete Elixir and Phoenix Bootcamp
